Our Company

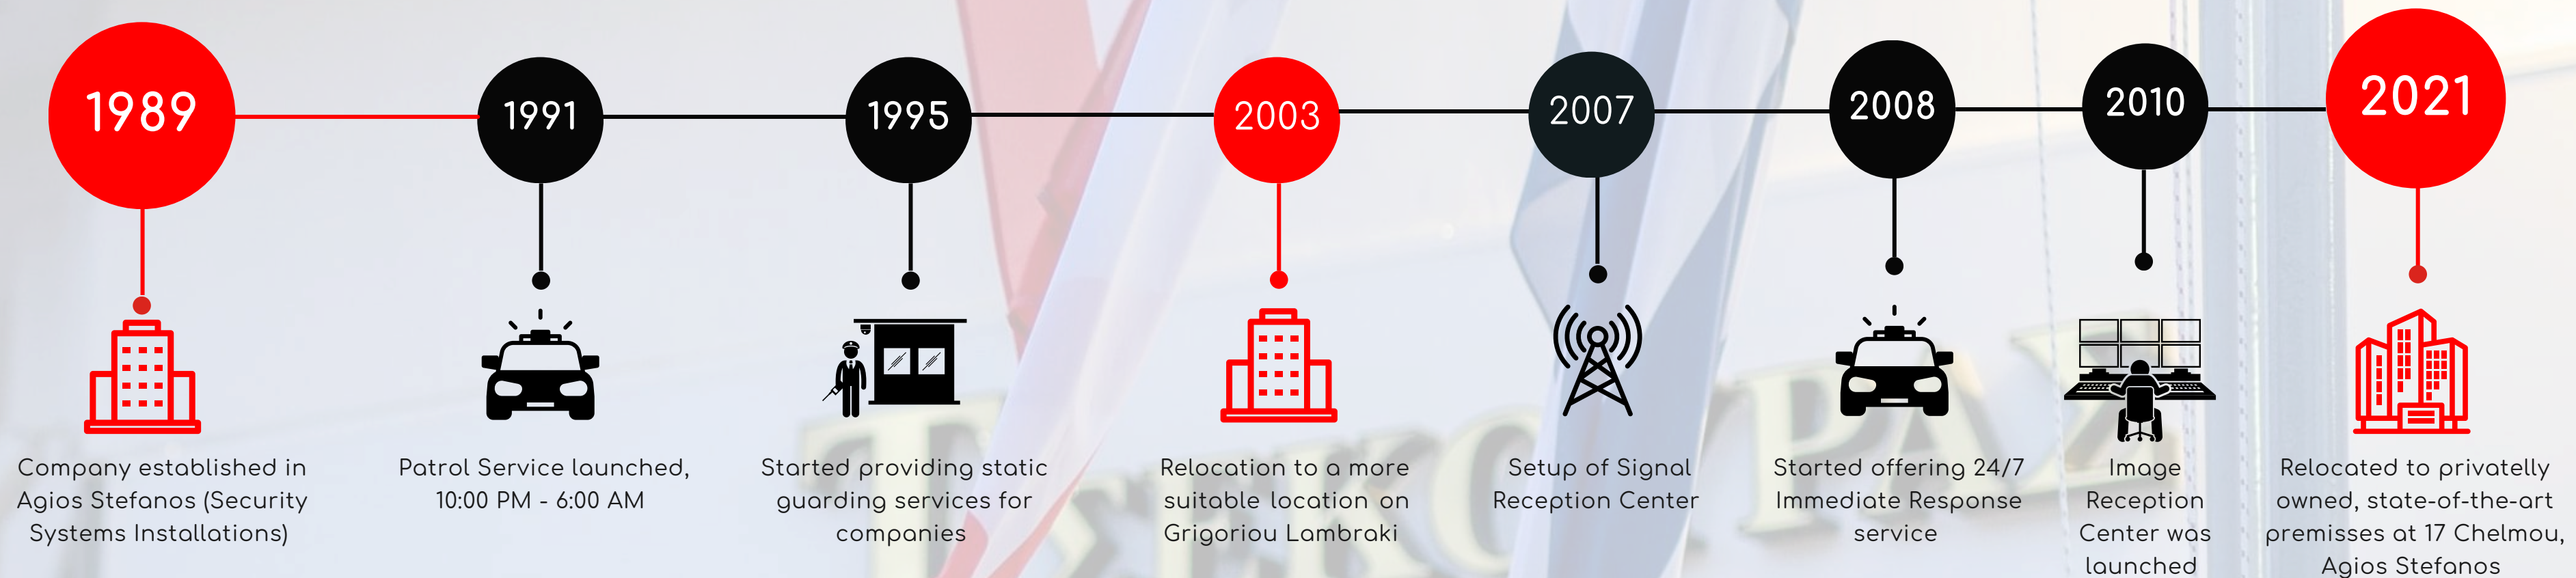

TSEKOURAS SECURITY was founded in 1989 and is based in a privately owned, purpose built building in Agios Stefanos, in the north of Attica district. Accumulating expertise from the US, the company specializes in the installation of security, access control, CCTV, and fire detection systems, as well as security services for both commercial and private properties.

To protect people, homes, businesses and properties of significant value to our clients, we design, install, and offer maintainance services for security systems, alongwith patrol, immediate response, and guarding services. All incoming information from connected systems and clients is collected and evaluated at our privately owned, in-house Signal Reception Center to facilitate instant evaluation and/ or intervention when needed.

Company Development Timeline

The History and Evolution by Year

We provide 24/7 technical support to ensure the uninterrupted operation of your security systems. We are always available for immediate problem resolution and to provide advice.

Services

What we offer

To protect people and buildings of particular value to our clients, we provide top-level services with state-of-the-art hardware.

01

Signal Reception Center

Our Signal Reception Center is equipped with a state-of-the-art server with a static IP and specialized signal management software. Beyond the modern technology, the most important aspect is that the Alarm Signal Reception Center of Tsekouras Security is privately owned, and is equipped with 12 dedicated static IP lines and 12 landlines, ensuring immediate and effective response to any incident.

02

Signal Reception Center via GPRS

Signal Reception Center via GPRS Connection. This connection enables us to establish a secured two-way communication between systems over the internet, ensuring control throughout all 7 ultra-modern platforms available for the smooth operation of your alarm system 24/7.

03

Image Reception Center

We have developed a top-of-the-line, privately owned Image Reception Center operating advanced software and equipped with state-of-the-art hardware for the highest possible level of security for our clients.

04

Image Signal Reception Center

Through the Digital Communicator embedded in the central control unit of your systems, the system installed in your premises, is automatically connected with our signal reception and processing center. This enables the reception and processing of valuable incoming data within seconds, such as system arming, disarming, identification of breach zones, communication control, and more.

Services

Data Collection & Evaluation – Personnel Monitoring

All incoming information from connected systems and our clients is collected and evaluated at our proprietary Signal Reception Center to enable immediate intervention if necessary. Our security personnel monitoring is conducted via a GPS tracker system in patrol vehicles, providing real-time location updates to the company's operations center and allowing immediate data dispatch ensuring the integrity of client contracts.

05

Immediate Response

This service releases a patrol vehicle as soon as an alarm signal is received, operating daily, 24 hours a day, year-round.

Patrols

The patrol service offered by Tsekouras Security aims to prevent potential malicious actions against safety and property. Our specially equipped patrol units inspect the guarded area one or more times within the agreed schedule.

06

Static Guarding

Static guarding offers maximum security for your premises, when implemented by trained guards responsible to protect, control access, monitor the security system, provide assistance, and respond immediately in case of emergency or danger.

07

Neighborhood Watch

At Tsekouras Security, we have developed a specialization in "Patrols – Neighborhood Watch," covering many areas in Attica. Neighborhood watch involves safeguarding homes located relatively close to each other.
